

## La Fe Enrichment Program is Hiring Robotics Instructor

### **La Fe Enrichment Program Vision Statement:**

We will bring out the inner genius in our students by inspiring them to showcase their gifts and talents, while gaining additional exposure to engineering, science, math and problem solving.

### **Schedule:**

Days: Monday-Friday

Hours: 3:00-5:00

The Robotics Program is great way to merge science and technology interests with collaboration and teamwork skills for building high-quality robots.

The Robotics Instructor will create a hands-on learning environment using robotics as a vehicle of instruction to help students gain exposure to engineering, science, math and problem solving. We are seeking the ideal candidate to lead the La Fe Robotics Program for the 2017-2018 school year.

### **Job Responsibilities:**

- Helps build enthusiasm among students in science and technology with robotics as a vehicle.
- Teach students the principles of building structurally sound robots.
- Explain clearly the functions of power source, sensors, motors and structural members of a robot.
- Notes observations on student progress.

### **Requirements/ Qualifications:**

- Bachelor's degree or experience in Science, Engineering or Education
- Demonstrated interest in math, science, technology, and engineering
- A strong ability to communicate effectively with student's grade level 3rd-8<sup>th</sup>
- Must have the ability to maintain discipline while directing the design and building experience.

**Apply at:** La Fe Human Resources, Administration Building, located at, 1314 E. Yandell, El Paso, TX 79902
